PRELIMINARY REMARKS

Sir:

Preliminary to examination, Applicants respectfully
submit the following remarks in the above-referenced
Continued Prosecution Application.

REMARKS

Reconsideration and allowance of this application
are respectfully requested.

Claims 1, 4-14, 17-22, 25-30, 33-35 and 37-84 are pending in this application, with Claims 1, 14, 21, 30, 37, 53, 61, 63 and 74 being independent. Claims 1, 4-14, 17-22, 25-30, 33-35 and 63-84 are allowed, and Claims 40-52 and 62 are objected to, but have been indicated as containing allowable subject matter. Accordingly, Claims 37, 39, 53 and 55-61 are the rejected claims, of which Claims 37, 53 and 61 are independent.

Applicants thank the Examiner for the courtesy of the personal interview that was conducted on October 3, 2001. In the interview, the Examiner agreed that the rejected claims would be allowable if independent Claims 37, 53 and 61 were amended to include the features set forth in Claims 40 and 62. The Examiner also noted that the Section 103 rejection of the rejected claims could be based just on Matsumoto et al. (U.S. Patent No. 4,860,026) and Sekiya (JP 1-242256); the Sugimoto et al. (U.S. Patent No. 5,477,248) reference was not needed in the rejection.

In Applicants' view, independent Claims 37, 53 and 61 are patentable as currently presented.

Allowable Claims 40 and 62 recite that the plural inks having different dye densities have different penetrabilities. This is one embodiment of the invention, but in Applicants' view, it is not a basic feature of the invention.

Matsumoto, et al. discloses a series of color inks having different densities in the same color series. Sekiya discloses an ink-containing member provided with a plurality of chambers. Applicants submit, however, that Sekiya does not teach or suggest anything about which ink is stored in each of the plurality of chambers. Accordingly, in Applicants' view, the claimed invention would not have been obvious from Sekiya and Matsumoto, et al.

Applicants' position is that rejected Claims 37, 53 and 61 recite, in an arrangement provided with a plurality of ink containers for containing a plurality of inks, which ink is contained in each of a plurality of ink containers and which different inks are contained in a single container -- but neither Matsumoto, et al. nor Sekiya discloses how the inks having different colors and inks having different

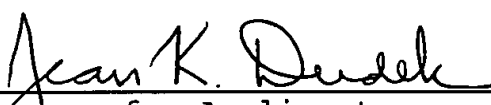

densities are divided and contained in a plurality of ink containers.

Accordingly, Applicants conclude that Matsumoto, et al. and Sekiya do not teach or suggest the features of Claims 37, 53 and 61, either singly or in combination. The rejected dependent claims are allowable for the reasons given with respect to their respective independent claims and because they recite features that are patentable in their own right. Individual consideration of each dependent claim is respectfully solicited.

Applicants request withdrawal of all outstanding rejections, and submit that the application is in condition for allowance.

Applicants' undersigned attorney may be reached in our Washington, D.C. office by telephone at (202) 530-1010. All correspondence should be directed to our address listed below.

Respectfully submitted,
